

KELLEY GROVES

Salt Lake City, UT | 435-660-8647 | groves1801@gmail.com

PROFESSIONAL SUMMARY

Technical systems builder focused on internal tools, reporting systems, operational dashboards, workflow software, and AI-assisted development workflows. Experience working across frontend systems, backend APIs, SQL databases, Domo reporting environments, Linux-hosted applications, and customer-facing operational tooling.

TECHNICAL SKILLS

Frontend & UI	React, Vue, TypeScript, Vite, Tailwind CSS, PrimeVue, Responsive dashboard UI
Backend & APIs	Python, FastAPI, Uvicorn, REST APIs, Session authentication, API routing
Data, BI & Reporting	Supabase SQL, PostgreSQL, SQLite, HeidiSQL, Domo dashboards, Domo ETLs/dataflows, Jupyter notebooks, OpenPyXL, KPI reporting, data cleanup and validation
AI-Assisted Workflows	Cursor, Claude, AI-assisted debugging, rapid prototyping, workflow refinement
Infrastructure & Hosting	Linux hosting, SSH/SFTP workflows, Git/GitHub, GitHub Pages, dedicated server setup
Additional	Lua scripting, FiveM integrations, Blender environment workflows

PROFESSIONAL EXPERIENCE

Countertop Source – Hurricane, UT

Data / Operations Systems | 2025 – Present

Develop internal tracking systems, reporting dashboards, and operational tooling used across production and management workflows. Build applications focused on reporting visibility, workflow tracking, operational metrics, data cleanup, and hosted internal systems. Support Domo dashboards, ETLs/dataflows, and operational reporting visibility across departments.

Countertop Source – Hurricane, UT

Project Manager | 2025

Managed fabrication and installation scheduling workflows while coordinating communication between fabrication teams, installers, and customers. Tracked operational timelines, workflow progress, and project visibility.

Western Rock Co – St George, UT

Asphalt Plant Operator | 2024 – 2025

Operated asphalt plant systems, loaders, and production equipment while supporting maintenance, troubleshooting, inspections, and operational uptime across daily production workflows.

SELECTED PROJECTS

IT Asset & Assignment Tracker

Centralized application for asset tracking, assignment history, software renewals, operational reporting, filtering, and import validation workflows.

Fabrication Quality Dashboard

Internal dashboard focused on KPI visibility, reporting cleanup, operational summaries, filtering, and drill-down reporting views using staged operational datasets.

Shop Labor Estimator

Browser-based estimating tool tied to configurable labor rates, export workflows, and operational reporting processes designed to improve consistency and maintainability.
